Studies of Religion Environmental Ethics Unit, Christian
NSW Catholic Sustainable Schools Project
November 2015
Introduction
To assist teachers undertaking the Environmental Ethics unit within the Stage 6 Studies of Religion. This Unit has been developed with assistance from the Office of Environment & Heritage (OEH), and the Association of the Studies of Religion (ASR). A small writing team was formed.

Writing team:
- Catholic Sustainable Schools Network – Sue Martin (St Ignatius’ College, Riverview) & Anne Lanyon (Columban Mission Institute)
- New South Wales Office of Environment & Heritage – Mark Caddey
- Association of the Studies of Religion – Louise Zavone
- Catholic Mission - Beth Riolo
- Catholic Education Archdiocese of Canberra & Goulburn - Kim-Maree Goodwin
- Loreto College Normanhurst - Libby Parker
- Marist Sisters College Woolwich - Andrew Dumas
- Our Lady of Mercy College Parramatta - Natalie White
- St Patrick’s Campbelltown Campbelltown - Maria Boulatsakos

Project Background
This resource provides up-to-date material for students and teachers wanting to engage with the Environmental Ethics component of the Studies of Religion Course. The nature of Christian Environmental Ethics is evolving in the context of the signs of the times. With the publication by Pope Francis on 24th May, 2015 of the first Encyclical on the environment, “Laudato Si’”, official Catholic Teaching on Environmental Ethics is taking a new direction. Catholic environmental teaching is moving from an anthropocentric position to a perspective of universal communion. As with Catholicism, Orthodoxy and Protestant variants are continuing to develop and provide guidance to their adherence in the forms of teachings and official documents. There is greater ecumenical dialogue between the Christian variants than ever before. An example of this is the Serafino Declaration which resulted from a conference held in South Australia in April 2015. This document aims at providing the tools for teachers and students to explore the ethical Christian principles underpinning different variants’ approaches to living out a Christian perspective in regard to the natural environment.
Studies of Religion Syllabus

Outcomes

A student:

- H1 explains aspects of religion and belief systems
- H2 describes and analyses the influence of religion and belief systems on individuals and society
- H4 describes and analyses how aspects of religious traditions are expressed by their adherents
- H5 evaluates the influence of religious traditions in the life of adherents
- H6 organises, analyses and synthesises relevant information about religion from a variety of sources, considering usefulness, validity and bias
- H7 conducts effective research about religion and evaluates the findings from the research
- H8 applies appropriate terminology and concepts related to religion and belief systems
- H9 coherently and effectively communicates complex information, ideas and issues using appropriate written, oral and graphic forms.

Suggested Unit Overview

The focus of this study is the contribution of significant people, ideas, practices and ethical teachings to an understanding of Christianity as a living dynamic religious tradition, in particular the area of environmental ethics.

- Ethical principles – Preliminary course (Year 11)
- Values
- Spectrum of Variants
- Teachings
  - The Christian teachings provided are suggestion of how the Principal Beliefs... *The Trinity, The Humanity and Divinity of Christ, Revelation, Salvation and Resurrection*, inform the teachings in relation to environmental ethics. These environmental teachings could include Stewardship, Co-Creation, Justice and Mission, These teachings are informed by:
    - Scripture
    - Traditional doctrine, Current doctrine—Catholic – Catholic Social Teachings, Orthodox Teachings, Anglican Synods,
    - Theologians from a range of variants
The following themes/paradigms within Christianity are highlighted:
- God as Creator
- Incarnation
- The relationship between God, the human and all creation
- Agape Love
- Discipleship
- Mission from Jesus
- Reign of God.

**Suggested Unit Introduction to Ethics**

Christian ethics are largely based on the principles found in the Bible for example Jesus’ Commandment of Love (Mt. 22:38), love of God, love of neighbour and love of self. In addition to this central ethical teaching the Beatitudes (Mt. 5) and the Sermon on the Mount provide further ethical guidance for Christian living. Parables of Jesus are also significant tools that teach about discipleship. All the teachings of Jesus develop the Ten Commandments of the Mosaic Law. The Christian Bible is particularly concerned about relationships; relationships that go wrong, the role of human behaviour, the impact of behaviour on others, and how relationships can be restored.

Scripture is the primary sacred text and therefore where God reveals what was first revealed in nature, God’s love of creation. There are also sacred writings from various teaching authorities, such as The Church Fathers, The Magisterium of the Catholic Church, The Anglican Synods of Bishops, Uniting Church Synods, The Patriarchs and theologians from several variants.

Some suggested *quotes* from scripture that are significant in a Christian ethical worldview include:

- “For since the creation of the world God’s invisible qualities – God’s eternal power and divine nature – have clearly been seen, being understood from what has been made” Romans 1.20
- “God saw everything that he had made and indeed it was very good” Genesis 1:31
- “O Lord, how manifold are your works! In wisdom you have made them all; The earth is full of your creatures” Psalm 104:24
In John 3:16, Jesus' incarnation is seen as an outpouring of God's love for the world - 'for God so loved the world that he gave his only Son, that whoever believes in him should not perish but have eternal life'. Christ's life of service involved a radical stance on the side of life.

- “And what does the Lord require of you but to do justice, and to love kindness, and to walk humbly with your God. Micah 6:8
- “Where were you when I laid the earth’s foundation? Job 38:4
- “Let justice roll down like waters, and righteousness like an ever-flowing stream.” Amos 5:24
- “The King will reply, ‘Truly I tell you, whatever you did for one of the least of these brothers and sisters of mine, you did for me.’ Matthew 25: 40
- And any other commandment (is) summed up in this word ‘love your neighbour as yourself’. Love does no wrong to a neighbour; therefore love is the fulfilling of the law. Romans 13:9, 10
### Suggested Unit Matrix

Christian Environmental ethics are an evolving area of Christian religious teaching, highlighting that God is the creator of all things and that humans need to work in partnership not only with God and the land, but with each other to ensure that the fragile environment of the world today is nurtured and protected.

| Definition/Explanation | Christians are taught to appreciate creation as God’s gift and to look on it with wonder and awe. Christians are taught they have a fundamental responsibility to care for | The core teaching is that the goods of the earth are to be shared by all with justice and equality. Creation belongs not to the few, but to the entire human family. | Reign of God  
Jesus’ teaching on the reign of God extols the virtues of respect, consideration, harmony and balance which are at the heart of modern  
Reign of God  
Christians are called to create the Kingdom of God “on earth as it is in heaven” (Matthew 6.10). Jesus’ teaching on the reign of God extols the
creation. In this sense they are God’s partners in creation and are responsible for ensuring that it is nurtured and cared for in a sustainable manner. The Christian understanding of stewardship guards against selfish or careless exploitation of the world’s resources. The Bible clarifies this responsibility: calls upon Christians to act as stewards/carers of the environment. Christians are called to create the Reign of God. Jesus’ teaching on the reign of God extols the virtues of respect, consideration, harmony and balance which are at the heart of modern environmental ethics. This requires just and equitable sharing in the

<table>
<thead>
<tr>
<th>Extend idea of Justice - not just creation belongs to few and to the entire human family but for creation to exist in itself to all species. Earth Resources are for the good of all not just a few. This call to justice has a number of dimensions:</th>
</tr>
</thead>
<tbody>
<tr>
<td>● Global justice and equity: environmental degradation is falling disproportionately on the poorer nations of the world. There is inherent injustice, particularly as such countries are less responsible for causing environmental destruction than wealthy nations</td>
</tr>
<tr>
<td>● Intergenerational justice and equity:</td>
</tr>
<tr>
<td>---</td>
</tr>
<tr>
<td>The true biblical hope at the heart of Christianity is a hope for this world, based on virtues of respect, consideration, harmony and balance which are at the heart of modern environmental ethics. This requires just and equitable share of the Created world’s resources, but also includes inherent respect for and harmony with Creation.</td>
</tr>
<tr>
<td>Nature of Trinity God the creator is revealed through the environment – that which is created reveals the creator: ‘Our very contact with nature has a deep restorative power; contemplation of its magnificence imparts peace and serenity,’ Pope John Paul II, Homily in Val Visdene, Italy, 1990</td>
</tr>
<tr>
<td>Human beings are appointed by God as stewards of the earth to cultivate and protect it. From this fact there comes what we might call their ‘ecological vocation’, which in our time has become more urgent than ever - Angelus Address, Castel Gandolfo 2002)</td>
</tr>
<tr>

Priest, Eco-theologian, Thomas Berry has suggested that our focus shift from human (anthropocentric) to the earth as the centre (Biocentric).

Is an Irish Columban Missionary Priest whose experience with the T’Boli people in Mindanao, Philippines lead him on a journey of ecological conversion. He has been writing on greening the Church for over 30 years.

Over the past 20 years, Sally McFague has produced a series of articles and books on ecological matters she is currently without doubt one of the most influential popular theologians in North America.

He has long placed the environment at the head of his church’s agenda, earning him numerous awards and the title ‘Green Patriarch’.

He is an ecological theologian, pastoral and liturgical scholar, specialist in historic Christian attitudes toward nature and spirituality.

He explores the place and vocation of human beings in the earth community.

Denis Edwards is Senior Lecturer in theology. He is a theologian who sees ecology at the heart of Mission.

In Pope Francis’ inaugural homily, Pope Francis stressed that people should safeguard the Earth. "Let us be 'protectors' of creation, protectors of God's plan inscribed in nature, protectors of one another and of the environment."

**Suggested Unit Church Teachings on the Environment**

**Laudato Si’ Summary** – Australian Catholic Bishops Catholic Church Teachings on the Environment

**From the Catholic Catechism**

The seventh commandment enjoins respect for the integrity of creation. Animals, like plants and inanimate beings, are by nature destined for the common good of past, present and future humanity. Use of the mineral, vegetable and animal resources of the universe cannot be divorced from respect for moral imperatives. Man’s (sic) dominion over inanimate and other living beings granted by the Creator is not absolute; it is limited by concern for the quality of life of his neighbour, including generations to come; it requires a religious respect for the integrity of creation. (No. 2415)

God wills the interdependence of creatures. The sun and the moon, the cedar and the little flower, the eagle and the sparrows: the spectacle of their countless diversities and the inequalities tells us that no creature is self-sufficient. Creatures exist only in dependence on each other, to complete each other, in the service of each other. The beauty of the universe: the order and harmony of the created world results from the diversity of beings and from the relationships which exist among them. Man discovers them progressively as the laws of nature. They call forth
the admiration of scholars. The beauty of creation reflects the infinite beauty of the Creator and ought to inspire the respect and submission of man's intellect and will. (Nos. 340-341)

From Pope John Paul II

(Humanity), especially in our time, has without hesitation devastated wooded plains and valleys, polluted waters, disfigured the earth's habitat, made the air unbreathable, disturbed the hydrogeological and atmospheric systems, turned luxuriant areas into deserts and undertaken forms of unrestrained industrialization.

We must therefore encourage and support the "ecological conversion" which in recent decades has made humanity more sensitive to the catastrophe to which it has been heading. (Humanity) is no longer the Creator's "steward", but an autonomous despot, who is finally beginning to understand that (it) must stop at the edge of the abyss... At stake, then, is not only a "physical" ecology that is concerned to safeguard the habitat of the various living beings, but also a "human" ecology which makes the existence of creatures more dignified, by protecting the fundamental good of life in all its manifestations and by preparing for future generations an environment more in conformity with the Creator's plan. (Call to the Faithful, 2001)

The ecological crisis is a moral issue ... respect for life and for the dignity of the human person extends also to the rest of creation... We cannot interfere in one area of the ecosystem without paying due attention both to the consequences of such interference in other areas and to the well-being of future generations. (World Day of Peace Message, 1990).

It was the Creator's will that (we) should communicate with nature as an intelligent and noble master and guardian and not as a heedless exploiter and destroyer. (Redemptor Hominis - The Redeemer of Man, 1979, No. 15).

Man (sic) thinks he can make arbitrary use of the Earth, subjecting it without restraint to his will, as though it did not have its own requisites and a prior God-given purpose, which man can indeed develop but must not betray. Instead of carrying out his role as a cooperator with God in the work of creation, man sets himself up in place of god and thus ends up provoking a rebellion on the part of nature. (Centesimus Annus - On the Hundredth Anniversary of Rerum Novarum, 1991, No. 37)
Archbishop Renato Martino, the Permanent Observer of the Holy See to the United Nations (UN)
The activities of twenty-five percent of the world’s population are responsible for almost seventy-five percent of the global emission of greenhouse gases. Global warming, as it is popularly called, is global in scale. It recognizes no boundaries, no nationalities, no cultural divides. It is the great equalizer with unpleasant consequences. (Address to the UN, 28 November 2001)

2. **Essay**

Eg Based on this research students are asked to write an extended response that:
Evaluates how Christianity provides ethical guidance in environmental ethics.
Students will need to provide THREE issues of ethical guidance within their response.

**Marking Criteria**

**YEAR 12 STUDIES OF RELIGION [k3] - MARKING CRITERIA**

**Christianity – ETHICS**

**STUDENT NAME:**

- Extensive evaluation of the guidance provided by Christianity to THREE issues concerning the environment [H5]
  - Extensive use of the ethical teachings of Christianity in relation to the environment [H4]
  - Extensive and effective research as evidenced in a correct and appropriate bibliography [H7]
  - Extensive and integrated use of correct subject specific terminology [H8]
  - Extensive and well-articulated response that incorporates [H9] [17-20]

- Thorough evaluation of the guidance provided by Christianity to AT LEAST TWO issues concerning the environment [H5]
  - Thorough use of the ethical teachings of Christianity in relation to the environment [H4]
  - Thorough and effective research as evidenced in a correct and appropriate bibliography [H7]
  - Integrated use of correct subject specific terminology [H8]
  - Well-articulated response [H9] [13-16]

- Sound evaluation of the guidance provided by Christianity to AT LEAST ONE issues concerning the environment [H5]
  - Sound use of the ethical teachings of Christianity in relation to the environment [H4]
  - Sound research and selection of information as evidenced in an appropriate bibliography [H7]
  - Sound use of correct subject specific terminology [H8]
  - Sound response [H9] [9-12]

- A basic description of ethical teachings within Christianity that may reference environmental issues [H4, H5]
  - Limited research evident [H7]
  - Some use of subject specific terminology [H8] [5-8]
3. **Short answer**
   
   **Belief – Theology Activities 104**
   
   You are to complete the following activities in your *exercise book* as you read:

   1. Who was **Hildegard von Bingen**? What did she do?
   2. How is **greenness** a part of Hildegard’s work?
   3. What is **St Francis of Assisi**’ unique contribution to environmental ethics?
   4. Quote the “**Canticle of the Sun**”.
   5. Who was **Fr Pierre Teilhard de Chardin**?
   6. How did Fr Pierre Teilhard de Chardin see **God in the universe**?
   7. What is a **Biocentric** view?
   8. What is a **Theocentric** view?
   9. What has **Sallie McFague** produced?
10. What does Sally McFague advocate?

11. Describe Sally’s motherly view.

12. What did Pope Francis say in his inaugural homily?

12th Century AD - Blessed Hildegard von Bingen

Blessed Hildegard von Bingen (1098 - 1179) was a woman of extraordinary talents. She was Benedictine abbess, who was a Christian mystic, visionary, theologian, composer, and poet. In one of her hymns to the Holy Spirit, she speaks of the Spirit as a creative power permeating the whole universe, as a source of communion between the people, and as the one from whom come clouds, winds, rains and the springs of freshwater:

Occurrence of power permeating all 
in the Heights upon the earth 
in all deeps; 
you bind and gather 
all people together; 
out of you clouds 
came streaming, winds 
take wing from you, dashing 
grain against stone; 
and ever fresh springs 
well from you, washing 
the evergreen globe
Hildegard constantly uses the word greenness to express the fruit fullness of the spirit. She sees the spirit as the source of life in a greenness of nature and in a greenness of our spiritual lives. Greenness and the Creator spirit go together. It is because of this association that Eastern Christians celebrate Pentecost with green investments and green foliage. Hildegard did not know what we know about the evolution of the universe, and the life of the earth. Berks Hildegard wrote botanical and medical texts, and there is no doubt that, where she alive today in, she would be most interested in what contemporary science says that the emergence of our world and she would certainly have seen this as the work of the creator spirit.

(Edwards, 2012, p 43)

12th century AD – St Francis of Assisi
Saint Francis of Assisi was a 12th century monk who showed another way to approach the world. Francis was a wandering preacher of the gospel. Francis, perhaps more than any there came to understand the human Jesus. He knew Jesus as the song of a loving and caring Abba or Father, who was deeply within all things. Francis accepted every person, down to the most repulsive leper, and everything in creation as his family. The sun, the birds, even the wind spoke to Francis of the Spirit of God. The world was filled with poetry that praised and thanked Abba for creation.

Francis writes liked as though he were a medieval psalmist, praising God for the gifts of creation:

Praised be You my Lord with all Your creatures,
especially Brother Sun,
Who is the day through whom You give us light.
And he is beautiful and radiant with great splendour,
Of You Most High, he bears the likeness.
Praised be You, my Lord, through Sister Moon and the stars, with
In the heavens you have made them bright, precious and fair.

Canticle of Brother Sun and Sister Moon – St Francis

(Hill, 1998, p 254)
1881 - 1951 – Fr Pierre Teilhard de Chardin
Teilhard was a French philosopher, geologist and Jesuit Catholic priest. Teilhard actually experienced the universe as animated by God and was able to feel divine energy in all the material things around him. He said it was his calling “to feel with the earth” and to come to union with his God through the same earth. Through the structures of the earth Teilhard seemed to be able to learn of the personality of God. In his scientific work he could be in touch with the love that charged the world.

“Nothing here below is profane for those who know how to see”
- Teilhard

(Hill, 1998, p 255)

1914 – 2009 – Fr Thomas Berry - Priest, Eco-theologian
Thomas Berry has suggested that our focus shift from human (anthropocentric) to the earth as the centre (Biocentric). He points out that environmental devastation has brought the human community to a crisis, perhaps the most momentous in the planet’s history. Today’s generation of humans is experiencing profound changes in the very structure and chemistry of the planet. These changes of a magnitude that is unparallelled in human history; many of the developments of the past sixty-five million years of the planet’s history are being extinguished. It is Berry’s conviction that to face the challenges of this new age a new revelation is needed and that this new revelation must come from the universe itself.

(Hill, 1998, p 280)

Sallie McFague
Over the past 20 years, Sally McFague has produced a series of articles and books on ecological matters she is currently without doubt one of the most influential popular theologians in North America. Sally McFague takes a seemingly more radical critical standard. She challenges some of the basic formulations of the Christian faith, regarding them as inappropriate to current societal needs. She does not hesitate to advocate guarding them in favour of symbols and metaphors more in tune with the ecological needs of our time. McFague advocates the radical step of abandoning all vocabulary that associates God with triumphalism, monarchy and patriarchies. Such imagery has, she believes, been relatively constant throughout Christian history. In our day, however, it is clearly harmful, since it has been
used to justify and condone harsh, unloving attitude is not only to what other human beings as in parts of the old Testament, but also towards other forms of animals and vegetative life. To replace these socially harmful use of God, McFague proposes that we conceive of God’s mother, a lover and friend, The second reason that McFague gives for her advocacy of new images of God is the importance that such images will metaphors have in our thinking and our lives. For her they are of extreme importance since they always have the potential to determine our concepts and our patterns of living. She writes:

*The metaphors, the constructions we accept and live by may well control the future - may help to determine whether we have one and what it may be.*

Given the social importance of theological imagery, McFague choice of terms to think about God is determined by a current social need. She sees contemporary views of reality as being dominated by ideas of ‘relationship and interdependence, change and transformation’ and consequently nominates these as the categories in which contemporary theology needs to function. In her view, ‘mother’, ‘lover’, and ‘friend’ admirably satisfies this criterion. In particular they encourage responsible attitudes towards environment.

Another of McFague’s radical ways of envisaging God is to conceive of the world as God’s body. She recognises that this idea may appear shocking to many people, but she points out that it is in fact an old idea with roots in stoicism. She points out that such a way of thinking about God would bring God much close to us. God would become an immediately perceived presence, a far cry from the distant monarch remains invisible and intervenes only in dramatic ways. Such a God would more easily be seen to have a direct unmediated contact with earthly realities, a God who challenges the traditional ecologically destructive dualism between spirit and the matter. Moreover if we were conscious of dealing with chords body when we interact with the world we will be very hesitant to do it harm. In this way a sense of ecological responsibility would be enhanced.

Australian Catholic Bishops *Laudato Si’ Summary* – Catholic Church Teachings on the Environment

4. Web quest

a) What is the core business of Catholic Earth Care Australia?

b) What message is Catholic Earth Care Australia responding to?

c) List the FOUR things this includes:
d) Outline TWO initiatives Catholic Earth Care is involved in?

Initiative 1

Initiative 2

UNITING JUSTICE AUSTRALIA - Go to http://www.unitingjustice.org.au/environment/about

e) What is Uniting Justice Concerned about?

f) Where does the Uniting Church’s commitment to the environment arise from?
g) How does the Uniting Church regard Climate Change? Give an example.

h) Summarise ONE UCA Statement, regarding the environment

EDMUND RICE CENTRE - Go to [http://www.erc.org.au/](http://www.erc.org.au/) Click on “Pacific Calling Partnership

i) What is the Pacific Calling Partnership unit?

j) What is happening in Kiribati?
k) How is ERC responding?

l) How does Caritas suggest a response to climate change must go beyond a scientific and political agenda?

m) What evidence exists for climate change? Give 2 examples.

CARDINAL GEORGE PELL – [Google](https) “SMH Pell row with climate scientist heats up” and click on the first link.

n) Outline Cardinal Pell’s view on human induced climate change?
o) Outline Cardinal Pell’s view on human induced climate change?

Google “Australian Be prudent with climate claims” and click on the first link.

p) What evidence does Cardinal Pell quote to argue against human induced Climate Change?

Google “ABC Godless greens” and click on the first link.

q) How have Pentecostal churches, like Hillsong, traditionally been anthropocentric?

r) How have Pentecostal views been changing? Refer to Aaron Swoboda Armos Yong work.
Google “Katharine Schori Climate Change Denial is Immoral” and click on the first link.

s) What is Episcopal Bishop Katharine Schori view on climate deniers? Explain reasons for this position

Suggested Resource list

Environmental Ethics Resources
This is an introductory list. Many more environmental ethical resources are available. If you have an interesting one please share with us.

General Sustainability

Teaching 7-10
